

Notice on Operation Requirements for BYD HVB/HVM+/HVS+ Series and Fronius Inverter Compatibility

Dear Valued Partners,

Fronius and BYD have released the official compatibility statement concerning the BYD Battery-Box HVB, HVM+, HVS+ batteries and Fronius inverters.

[Fronius Compatible Batteries](#)

[BYD Compatible Inverter List](#)

To ensure the correct operation of this system, please kindly note the following 3 requirements:

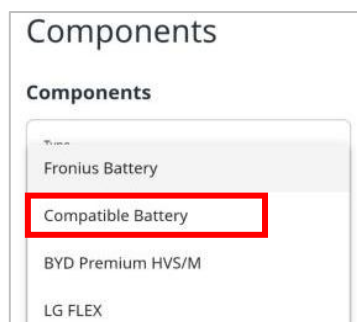

- **Please ensure that the BYD HVB / HVS+ / HVM+ firmware is upgraded to version 1.29 or higher (mandatory).**

For detailed upgrade procedures, please install BYD Energy App and refer to the guide via [this link](#).

- **Please ensure that the Fronius inverter firmware is upgraded to the latest version 1.39.5-1 or higher.**

The specific upgrade method via Solar.web is available through [this link](#).

- **On the battery configuration page of the Fronius inverter, please select the "Compatible Battery" option as required when using HVB, HVM+, HVS+ batteries (mandatory).**
